HOW TO HANDLE YOUNG EVERGREENS

YOUNG EVERGREENS, if dry on arrival, should be soaked in a tub of water. Shade after planting. Keep well watered. All young evergreens like lots of water and good drainage.

Our **POT GROWN TREES** do not have to be shaded—plant where you want them to grow. **POT GROWN TREES HAVE NO SET BACK—THE ROOTS ARE NOT DISTURBED.** You should not lose one if you handle them properly.

One important thing to remember in planting trees is to avoid exposing the roots to the sun and wind. Trees without a protection of dirt on the roots easily suffer from drying out, so it is important to keep the trees in the box until ready to plant, or cover the roots with wet burlap.

Soil must be thoroughly prepared and in a fine mellow condition. Dig the holes so that there is plenty of room for the natural spread of the roots. Sift the fine dirt around the roots, allowing them to spread out in the natural way.

On Receiving Pot Grown Trees

See that the roots are WET.—Dig a hole and plant. → Water each day until started. **THEY ALL GROW.**

GROWN AND PACKED BY H. D. BELCHER

ROCKY MOUNTAIN EVERGREEN COMPANY

EVERGREEN, COLORADO, U. S. A.

On Big Cub Creek

Elevation, 8,000 feet

The Rocky Mountain Evergreen Nursery is located at the highest elevation of any commercial nursery in the world. Our stock will stand shipping, and will grow faster when taken down from this high elevation.
